

Professional Summary

Full Stack Developer with 4+ years of experience building high-performance web and mobile ecosystems across the MERN stack, React Native, and TypeScript. Specialized in architecting AI/RAG systems (LangChain.js, vector databases, LLMs), scaling event-driven microservices via Apache Kafka, and hardening APIs against OWASP Top 10 vulnerabilities.

Skills

- **Frontend** — React.js, Next.js, TypeScript, Redux, HTML5, CSS3, Material UI, Bootstrap, Tailwind CSS, Google Analytics
- **Mobile** — React Native, Offline-First Architecture, Local Storage, Navigation
- **Backend & Messaging** — Node.js, Express.js, REST APIs, WebSockets (Socket.IO), Apache Kafka (Topic Partitioning, Offset Management, Consumer Groups)
- **Databases & Caching** — MongoDB, Mongoose ODM, MySQL, Redis (Caching, Session Management, High-Throughput Storage)
- **Generative AI & RAG** — LangChain.js, Vector Databases (MongoDB Atlas Vector Search, ChromaDB), Semantic Search, Context-Aware Prompt Engineering, LLM API Architectures
- **Third-Party & Platform APIs** — Meta Graph API (Facebook & Instagram), Firebase Admin SDK (Cloud Messaging), Google Geocoding API, Google OAuth
- **Security & DevOps** — OWASP Top 10 Mitigation, JWT Authentication, Role-Based Access Control (RBAC), Rate Limiting, Input Sanitization, TLS Encryption, CSP/HSTS Headers
- **Methodologies** — Agile/Scrum, Event-Driven Architecture, Microservices, Pagination Models, Micro-frontend Components

Professional Experience

Software Developer, Laxmi Enterprises Deployed distributed backend systems using Node.js, Express.js, Apache Kafka, and Redis, processing 50,000+ daily events; built real-time WebSocket (Socket.IO) communication across 3+ microservices, cutting dashboard latency by 42%. Developed React.js/Redux frontends, improving rendering speed by 25%.	09/2025 – Present
Freelance Full Stack Developer, Independent Delivered 4 client web/mobile builds using React.js, React Native, Next.js, and Node.js, meeting 100% of requirements on schedule with a 4.9/5.0 satisfaction rating.	06/2025 – 08/2025
Software Developer, Progressix Delivered 4+ enterprise MERN applications with JWT/RBAC security for 15,000+ users; optimized dashboards via server-side pagination and Redis caching, cutting response times by 35%. Built a reusable React.js/Express.js component library, accelerating development by 25% across 4+ systems.	07/2023 – 06/2025
Software Developer (Contract), Progressix Built 10+ backend modules with a 100% on-time delivery rate; refactored legacy components across 4+ platforms, cutting runtime errors by 18%.	04/2022 – 06/2023
Software Developer Intern, Progressix Fixed 80+ cross-browser bugs and documented codebases and API specs, reducing onboarding time by 30%.	04/2021 – 03/2022
Customer Operations Executive, Concentrix Resolved 85 emails/day, cutting response time from 4.2 to 1.8 hours and lifting CSAT to 4.9/5. On direct company payroll from April 2021 onward.	09/2017 – 06/2023

Projects

RAG-Powered Document Intelligence & AI Search,

Node.js, Express.js, TypeScript, React.js, LangChain.js, Google Gemini API, MongoDB Atlas Vector Search, MySQL

- **Orchestrated** a full-stack Retrieval-Augmented Generation (RAG) system over user documents (PDF, DOCX, CSV) using LangChain.js to chunk and embed content, improving data searchability by 40% with source-cited, hallucination-resistant responses.
- **Integrated** the Gemini API into a React Native app for AI-driven semantic product search, replacing static filters with adaptive, context-aware query generation.

Real Estate Lead Management Platform, *Node.js, Express.js, MongoDB, Firebase Admin SDK, JWT, RBAC*

- **Architected** a multi-tenant backend API modeling organizations, leads, follow-ups, and projects with role-scoped access; automated reminders and attendance tracking via node-cron and Firebase Cloud Messaging (FCM) push notifications.
- **Secured** the API with JWT auth, OTP verification, and RBAC, hardened via rate limiting, Mongo query sanitization, Helmet, and HPP, with geocoding for field-agent location capture.

Social Media Lead Aggregator, *Node.js, Express.js, React.js (Vite), MongoDB, Meta Graph API*

- **Built** a modular MERN platform aggregating posts, comments, and leads from Facebook and Instagram via the Meta Graph API and webhook subscriptions, using a Factory-pattern service layer that lets a new platform integrate as a single class.
- **Implemented** a real-time Instagram hashtag listener that auto-captures engagement into leads, surfaced through a React/Vite dashboard for lead and post management.

Real-Time & Event-Driven Systems, *Apache Kafka, Socket.IO, Node.js, React.js, MongoDB, Express.js*

- **Designed** an event-driven order-tracking platform using Apache Kafka (topic partitioning, offset management) and Socket.IO, ensuring zero data loss on service restart.
- **Programmed** real-time multiplayer games (Ludo & Rummy) with server state synchronization, failover connection-recovery workflows, and active fallback bot logic.

OWASP-Hardened Enterprise Administration Portals, *MERN Stack, JWT, RBAC, TLS, OWASP Top 10*

- **Hardened** a centralized MERN submission platform against OWASP Top 10 using rate limiting, input validation, TLS, and CSP/HSTS headers with centralized logging; assembled a 3-tier RBAC system (User/Admin/Super Admin) with location-based access, multi-column filtering, and asynchronous spreadsheet downloads.
- **Engineered** “Flixxit” (OTT streaming with custom players), “Boost My Resume” (OAuth-secured portfolio scanner), and “Jaivic Wellness” (browser media capture with strict 50MB validation).

Cross-Platform Offline-First Mobile Applications, *React Native, REST APIs, Offline Storage*

- **Developed** “Media Vault,” a cross-platform React Native app with offline-first media lifecycle management (upload, preview, tagging) and zero third-party player dependencies.
- **Deployed** a suite of 3 educational applications (CrackJEE, NEET prep, OMR Test App) incorporating instant OTP authentication and offline-accessible QR content delivery modules.

Full-Stack Web Platforms, *Next.js, React.js, Node.js, Express.js, Material UI*

- Built 4 full-stack platforms spanning community networking (Next.js SSR, secure auth, dynamic routing), OTT streaming (subscription management, custom video player), resume management (Google OAuth, Google Analytics, paginated search), and media capture (drag-and-drop upload, live browser camera/mic recording with 50MB size enforcement).

Certifications

Full Stack Development Bootcamp — UpGrad

Education

Bachelor of Computer Applications (BCA),

Vivekananda Institute of Professional Studies, IP University

08/2014 – 06/2017

Languages

English — Fluent

Hindi — Native
