Professional Summary

Full Stack Developer with 4+ years building production-grade web and mobile apps across MERN, React Native, and TypeScript. Specialized in real-time systems (Socket.IO, Kafka), Redis caching, and secure REST APIs (JWT, RBAC). Experienced in AI-assisted development workflows (Claude, ChatGPT, Gemini APIs) to accelerate delivery and code quality.

Skills

Frontend — React.js, Next.js, TypeScript, Redux, HTML5, CSS3, Material UI, Bootstrap, Tailwind CSS, Google Analytics

Mobile — React Native, Offline-First Architecture, Local Storage, Navigation

Backend — Node.js, Express.js, REST APIs, JWT Authentication, WebSockets (Socket.IO), RBAC

Databases — MongoDB, Mongoose, MySQL, Redis (Caching & Session Management)

Messaging — Apache Kafka — Producers, Consumers, Topic Partitioning, Offset Management

AI Tools — Gemini, Claude, OpenAI APIs — Prompt Engineering, Context-Aware Queries, AI-Assisted Development

Security — OWASP Top 10, Input Validation, Rate Limiting, TLS Encryption, CSP / HSTS Headers, Google OAuth

Concepts — Agile, Microservices, Event-Driven Architecture, Real-Time Systems, Offline-First, CRUD, Pagination

Professional Experience

Software Developer, Laxmi Enterprises

09/2025 – Present

- Design and build scalable **distributed backend systems** using **Node.js**, **Express.js**, **Apache Kafka**, and **Redis** to process high-throughput data pipelines.
- Implement real-time bidirectional communication using **WebSockets** across **3+ services**, enabling live dashboards and eliminating manual page-refresh cycles.
- Build responsive, component-based frontends with **React.js** integrated with secure **REST APIs**.

Freelance Full Stack Developer, Independent

06/2025 – 08/2025

- Delivered end-to-end web and mobile applications for multiple clients using **React.js**, **React Native**, **Next.js**, **Node.js**, and **Express.js**.
- Created custom dashboards, automated reporting systems, and multi-step form workflows; maintained direct client communication throughout the project lifecycle.

Software Developer, Progressix

07/2023 – 06/2025

- Architected and shipped multiple full-stack **MERN** applications with secure **REST APIs** protected by **JWT** authentication and **RBAC**.
- Built admin dashboards with advanced filtering, pagination, and **Excel export**; improved performance by integrating **Redis caching**, cutting API response times.

Software Developer (Contract), Progressix

04/2022 – 06/2023

- Delivered backend modules and frontend features on a part-time contract engagement while transitioning from customer operations into full-time software engineering.
- **Built** reusable **React.js components** and **Node.js / Express.js** REST endpoints supporting 4+ internal MERN stack projects with focus on maintainability.

Software Developer Intern, Progressix

04/2021 – 03/2022

- Contributed to frontend development using **React.js** and integrated backend **REST APIs** across **5+ MERN stack projects**, accelerating delivery timelines through reusable component architecture.
- Debugged, tested, and documented features across the full stack, gaining end-to-end exposure to the software development lifecycle.

Customer Operations Executive, Concentrix

09/2017 – 06/2023

- Managed **80–90+ customer emails** daily, consistently resolving issues within **SLA** deadlines in a high-volume operations environment.
- Maintained high **CSAT** scores through clear written communication, proactive follow-ups, and effective stakeholder management across distributed teams.
- On third-party staffing/payroll from 09/2017 to 03/2021; converted to direct payroll April 2021 onward.

Projects

Kafka Eats — Real-Time Order Tracking System,

Apache Kafka, Node.js, React.js, MongoDB, Socket.IO

- Architected **event-driven** order platform using **Kafka** (producers, consumer groups, topic partitioning) with **React.js + Socket.IO** real-time dashboard and **Node.js/Express/MongoDB** backend; demonstrated message replay via **offset management**.

AI-Powered Product Search, React Native, Gemini API

- Integrated the **Gemini API** into a **React Native** app to power intelligent product search, replacing traditional keyword filtering with an **AI-driven query layer**.
- Built dynamic prompt construction at runtime using user input and product data to generate accurate, inventory-aware search results.

OWASP Compliance Secure Application, MERN Stack, JWT, RBAC, TLS

- Engineered a hardened **MERN** application aligned with **OWASP Top 10** using JWT, RBAC, rate limiting, input validation, TLS encryption, and security headers (CSP, HSTS).
- Added centralized logging and monitoring for real-time threat detection across all API endpoints.

Media Vault, *React Native, Offline-First Architecture, Local Storage*

- Built cross-platform **React Native** app with full **offline-first** media lifecycle (upload, preview, edit, delete, tagging) for images/audio/video/text, including **custom in-app audio player** with no third-party dependencies.

User & Admin Submission Management System, *React.js, Node.js, Express.js, MongoDB, RBAC*

- Built **MERN** form submission platform with 3-tier **RBAC** (User/Admin/Super Admin) and **location-based access control**; admin dashboard supports real-time tracking, filtering, pagination, and **Excel export**.

Flixxit — OTT Streaming Platform, *React.js, Node.js, MongoDB, Express.js*

- Engineered a scalable OTT platform with secure authentication, subscription management, a custom video player, and optimized content delivery APIs.

Admin Panel System, *React.js, Material UI*

- Created a responsive admin interface with **Material UI** supporting CRUD operations, pagination, and role-based authentication.

Education & Testing Apps, *React Native, REST APIs, Offline Storage*

- Built CrackJEE and NEET exam prep, OMR Test App, and E-Learning App with OTP login, QR-based content delivery, and offline storage.

Real-Time Multiplayer Games — Ludo & Rummy, *React Native, Express.js, Socket.IO*

- Built multiplayer games using **Socket.IO** with game state management, bot logic, and auto-reconnection handling for uninterrupted real-time gameplay.

College Network Platform, *Next.js, Authentication*

- Built a **Next.js** community platform with server-side rendering, secure authentication, and dynamic routing.

Boost My Resume, *Next.js, Google, OAuth, Google Analytics, File Upload & Validation*

- Built resume upload flow (PDF/Word) with client-side validation, Google **OAuth** authentication, and **Google Analytics** tracking. Implemented paginated, searchable resume listing with real-time filtering.

Jaivic Wellness, *Next.js, Express.js, Material UI, Drag & Drop, REST APIs*

- Built media upload system with **drag & drop** plus live browser camera/mic capture — in-browser image snapshot, video/audio recording with preview and 50MB size enforcement.
- Developed separate **Express.js** backend with **REST APIs** for upload, retrieval, and deletion via a service layer.

Certifications

Full Stack Development Bootcamp — UpGrad

Education

Bachelor of Computer Applications (BCA),

Vivekananda Institute of Professional Studies, IP University

Languages

English — Fluent

Hindi — Native
