

Software Developer Intern, *Progressix*

04/2021 – 03/2022

- **Contributed** to frontend development using React.js, resolving 80+ cross-browser compatibility issues and integration bugs across 5+ active development pipelines.
- **Documented** full-stack codebases, API specifications, and database schemas, reducing onboarding times for incoming engineering cohorts by 30%.

Customer Operations Executive, *Concentrix*

09/2017 – 06/2023

- **Resolved** 85 customer emails daily, cutting average response time from 4.2 hours to 1.8 hours and driving CSAT scores to 4.9/5 over 18 months.
- **Managed** stakeholder communications and systematic issue tracking on direct company payroll from April 2021 onward.

Projects

RAG-Powered Document Intelligence & AI Search,

Node.js, Express.js, TypeScript, React.js, LangChain.js, Google Gemini API, MongoDB Atlas Vector Search, MySQL

- **Orchestrated** a full-stack Retrieval-Augmented Generation (RAG) system over user documents (PDF, DOCX, CSV) with source cited, hallucination-resistant responses.
- **Developed** an AI-driven text processing workflow using LangChain.js, chunking documents and creating embeddings that improved data searchability by 40% for end-users.
- **Integrated** the Gemini API into a React Native app for AI-driven semantic product search, replacing static filters with adaptive, context-aware query generation.

Real-Time & Event-Driven Systems, *Apache Kafka, Socket.IO, Node.js, React.js, MongoDB, Express.js*

- **Designed** an event-driven order-tracking platform using Apache Kafka (topic partitioning, offset management) and Socket.IO, ensuring zero data loss on service restart.
- Programmed real-time multiplayer games (Ludo & Rummy) with server state synchronization, **failover** connection-recovery workflows, and active fallback bot logic.

OWASP-Hardened Enterprise Administration Portals, *MERN Stack, JWT, RBAC, TLS, OWASP Top 10*

- **Hardened** a centralized MERN submission platform against OWASP Top 10 using rate limiting, input validation, TLS, and CSP/HSTS headers with centralized logging.
- **Assembled** a 3-tier RBAC system (User/Admin/Super Admin) with location-based access control, supporting granular multi-column filtering, page indexes, and **asynchronous** spreadsheet downloads.
- **Engineered** "Flixxit" (OTT streaming with custom players), "Boost My Resume" (OAuth-secured portfolio scanner), and "Jaivic Wellness" (featuring browser media capture with **strict** 50MB validation).

Cross-Platform Offline-First Mobile Applications, *React Native, REST APIs, Offline Storage*

- **Developed** "Media Vault," a cross-platform React Native app with offline-first media lifecycle management (upload, preview, tagging) and zero third-party player dependencies.
- **Deployed** a suite of 3 educational applications (CrackJEE, NEET prep, OMR Test App) incorporating instant OTP authentication and offline-accessible QR content delivery modules.

Full-Stack Web Platforms, *Next.js, React.js, Node.js, Express.js, Material UI*

- Built 4 full-stack platforms spanning community networking (Next.js SSR, secure auth, dynamic routing), OTT streaming (subscription management, custom video player), resume management (Google OAuth, Google Analytics, paginated search), and media capture (drag-and-drop upload, live browser camera/mic recording with 50MB size enforcement).

Certifications

Full Stack Development Bootcamp — UpGrad

Education

Bachelor of Computer Applications (BCA),

08/2014 – 06/2017

Vivekananda Institute of Professional Studies, IP University

Languages

English — Fluent

Hindi — Native
